

ANGRY PIG

Business Suite

Product Guide

Angry Pig Productions

v1.0.0 · March 2026

What Is the Angry Pig Business Suite?

A desktop business management application for Windows that combines five integrated modules — Finance, Invoicing, Inventory, Revenue Tracking, and Pricing — into one tool with a professional dark-themed interface.

One-time purchase. No subscriptions. No cloud. Your data stays on your computer in a local database. Nothing is uploaded anywhere.

What Makes It Different

Spreadsheet templates give you cells. The Business Suite gives you a workflow.

- **Cross-module automation** — Invoice paid? Sale logged automatically. Order completed? Stock deducted + revenue recorded.
- **Printable reports** — P&L statements, tax summaries, branded invoices. No spreadsheet can do this.
- **Business profile** — Enter your company info once. Every document uses it.
- **No formulas to break** — Everything is calculated by the app. No accidental overwrites.
- **Zero learning curve** — Fill in forms, click buttons. No spreadsheet skills needed.

The Five Modules

1. Finance Tracker

Sales log, expense log, monthly P&L, tax reserve tracking. The central hub — all other modules feed into it automatically.

2. Invoice & Client Manager

Create invoices, manage clients, track payment status. Mark an invoice as paid and it flows to Finance. Export branded PDF invoices with your business letterhead.

3. Inventory & Order Tracker

Product catalog with stock levels and low-stock alerts. Create orders, mark them complete — stock deducts automatically and revenue records in Finance.

4. Content Creator Revenue Dashboard

Track income across YouTube, Rumble, TikTok, Instagram, Facebook, Twitch, Patreon, and more. Platform breakdown, sponsorship tracking, monthly trends. Every entry auto-syncs to Finance.

5. Pricing Calculator

Break down costs (material, labor, overhead), set markup, see your profit and margin instantly. Compare margins across all your products.

Reports & Printing

- **P&L Statement** — Monthly breakdown with annual totals, expense categories. For banks, investors, or internal review.
- **Tax Summary** — Annual summary with business info, revenue/expense totals, deductible categories. For accountants and tax preparers.
- **Invoice PDF** — Branded invoice with your business header, client info, line items. Print or email.

No spreadsheet template can generate a branded P&L statement or tax summary. This is the desktop advantage.

Cross-Module Data Flow

Action	What Happens Automatically
Invoice marked PAID	Sale created in Finance
Order marked COMPLETED	Stock deducted + Sale created in Finance
Revenue entry added	Sale created in Finance

Enter data where it makes sense. Finance updates itself. The Dashboard shows the full picture.

Pricing

\$49 one-time purchase

- All 5 modules included
- Printable reports (P&L, Tax Summary, Invoices)
- Business profile for all documents
- CSV export for every table
- Local SQLite database — your data, your machine
- No subscriptions, no cloud, no recurring fees

Note: Also available as part of the Angry Pig Complete Bundle (\$129) with Creator Studio AI and VoxForge.

Get Started

Purchase

Visit angrypig.grancolumbia.live — \$49 via PayPal.

Activate

Launch the app, copy your Machine ID, email it to sales@angrypig.studio with your order number. Activation key within 24 hours.

Set Up Your Business Profile

Go to Settings, fill in your company info. Every invoice and report will use it.
