

ANGRY PIG PRODUCTIONS

Creator Studio AI

Activation Guide

One-Time License · Windows 10 / 11

Angry Pig Productions

angrypig.studio

v4.0 · April 2026

System Requirements

Requirement	Details
Operating System	Windows 10 or Windows 11
RAM	8 GB recommended (4 GB minimum)
Disk Space	500 MB available
Internet	Required for activation and cloud AI API calls
Local AI (Optional)	Ollama installed for offline AI processing

Note: Ollama is optional. Creator Studio AI works with cloud-based AI providers. Install Ollama only if you want to run AI models locally on your own hardware.

Installation

Download the installer from angrypig.studio after purchase. The download link is also included in your order confirmation email.

- Run the installer and follow the on-screen prompts
- The app installs to Program Files automatically
- Click Yes if Windows prompts for permission
- A desktop shortcut is created for you

Note: Windows SmartScreen may show a warning the first time you run the installer because Creator Studio AI is a new application. Click "More info" then "Run anyway" to proceed. This is standard for all new Windows software.

Activation Steps

Step 1: Launch Creator Studio AI

Open Creator Studio AI from your Start Menu or Desktop shortcut. The Activation Screen appears automatically on first launch.

Step 2: Copy Your Machine ID

Your unique Machine ID is displayed on the Activation Screen. This ID is tied to your specific computer.

- Click the Copy button to copy it to your clipboard
- Keep it handy — you will need it in the next step

Step 3: Email Your Machine ID

Email your Machine ID and order confirmation details to:

support@angrypig.studio

- You can click Open Email App on the Activation Screen to auto-fill a message with your Machine ID
- Include your order number or PayPal transaction ID

Step 4: Receive Your License Key

We generate a license key tied to your Machine ID and send it to your email. Keys are typically delivered within 24 hours.

Tip: Check your spam folder if you do not see the activation email within 24 hours.

Step 5: Enter the Key and Activate

Once you receive your activation key:

- Paste the key into the activation field on the Activation Screen
- Click the Activate button
- The app verifies the key and unlocks immediately

Tip: Your license key is permanent. You only need to activate once per machine. There are no recurring fees or renewal requirements.

First Steps After Activation

Once activated, follow these three steps to start producing content:

Set Up Channel DNA

Channel DNA is your creative fingerprint. A 5-step setup wizard teaches Creator Studio AI how to write like you:

- **Channel Setup** — Name, platforms, default video length
- **Audience Profile** — Target audience, niche, viewer pain points
- **Brand Voice** — Tone keywords, signature phrases, words to avoid
- **Video & Thumbnail Defaults** — Aspect ratio, style, host photo, logo, script template
- **Engines & API Keys** — Select AI providers, enter keys

Note: You can configure up to 5 separate channels, each with its own DNA. Switch channels with one click in the sidebar.

Configure at Least One AI Engine

Creator Studio AI supports multiple AI providers. You need at least one to generate scripts and content. The fastest way to get started:

- **Free option:** Visit aistudio.google.com/apikey
- Sign in with your Google account and generate a key
- Paste it into the Gemini 2.5 field in Channel DNA step 5

All available script and thumbnail engines:

Engine	Type	Cost	Sign Up
Gemini 2.5 Flash	Script	Free tier	aistudio.google.com
Claude (Anthropic)	Script	Pay per use	console.anthropic.com
ChatGPT (OpenAI)	Script	Pay per use	platform.openai.com
Grok (xAI)	Script	Pay per use	console.x.ai
OpenRouter	Script	Pay per use	openrouter.ai
Ollama (Local)	Script	Free (local)	ollama.com
DALL-E 3 (OpenAI)	Thumbnail	Pay per use	platform.openai.com
Ideogram	Thumbnail	Pay per use	ideogram.ai
Nano Banana 2 (Gemini)	Thumbnail	Free tier	aistudio.google.com
Gemini Imagen	Thumbnail	Free tier	aistudio.google.com

Tip: Start with a free Gemini key for scripting and Nano Banana 2 for thumbnails. Total cost: \$0.

Create Your First Project

With Channel DNA configured and at least one AI engine active, you are ready to create content:

- Click New Project in the sidebar
- Choose Full Auto, Enter My Idea, or Suggest Topics
- The AI researches your topic, writes a script, and generates a thumbnail
- Export your finished project or publish to all five platforms with one click

License Types

Creator Studio AI — \$59.99

One price, everything included. Your license key unlocks the full application with all features. No tiers, no add-ons, no separate upgrades.

- Single machine, tied to your Machine ID
- One-time purchase — no subscriptions or recurring fees
- Free updates included
- All 6 script engines, 4 thumbnail engines, and Tavily research
- Multi-Platform Publisher (YouTube, Rumble, TikTok, Instagram, Facebook)
- English and Spanish interface

Angry Pig Suite Bundle — \$149.99

Get Creator Studio AI plus the entire Angry Pig Productions suite at a discounted bundle price. Visit angrypig.studio for details.

Note: Your license key is tied to your Machine ID — one key per computer. If you change computers, contact support for a license transfer.

Troubleshooting

"Invalid License Key" Error

- Make sure you copied the entire key with no extra spaces
- Check that you are pasting into the correct field on the Activation Screen
- License keys are case-sensitive — copy and paste rather than typing manually

Key Does Not Work on This Computer

Each license key is generated for a specific Machine ID. If you are installing on a different computer than the one you registered:

- Email support@angrypig.studio with your new Machine ID
- Include your original order number
- We will issue an updated key for your new machine

Cannot Connect to Activation Server

- Verify your internet connection is active
- Check that your firewall is not blocking Creator Studio AI
- Try temporarily disabling VPN if you are using one
- If the problem persists, email support@angrypig.studio with your Machine ID

Windows SmartScreen Warning

This is normal for new applications. Windows SmartScreen warns about software it has not seen before.

- Click "More info" on the SmartScreen dialog
- Click "Run anyway" to proceed with the installation
- This only appears once — subsequent launches will not show the warning

Support

Email: support@angrypig.studio

Include your Machine ID and a description of the issue. We respond within 24 hours.
