

# CREATOR STUDIO AI

## Product Guide

---

**Your AI Production Crew. One App. One Payment.**

Angry Pig Productions  
[angrypig.studio](https://angrypig.studio)

v4.0 · April 2026

## What Is Creator Studio AI?

Creator Studio AI is a desktop application for Windows that handles the entire pre-production workflow for video content creators. Research, scripting, thumbnails, and multi-platform publishing — all in one app.

**No subscriptions. No cloud dependency. One payment of \$59.99 and it's yours forever.** AI features use your own API keys at wholesale rates — or the free Gemini tier at zero cost.

## The Problem It Solves

Independent creators spend hours every week on pre-production: researching topics, writing scripts, creating thumbnails, then reformatting everything for YouTube, Rumble, TikTok, Instagram, and Facebook. Each task uses a different tool, each tool charges a monthly fee.

**Creator Studio AI replaces that entire scattered workflow with a single desktop application.** One app. One purchase. Five hours of prep compressed into twenty minutes.

## What Makes It Different

	Creator Studio AI	VidIQ / TubeBuddy	Metricool	Jasper AI
<b>Type</b>	Desktop app (offline)	Browser extension	Web app	Web app
<b>Pricing</b>	\$59.99 one-time	\$7–\$49/mo	\$18–\$199/mo	\$49–\$125/mo
<b>Script writing</b>	Yes — 6 AI engines	No	No	Yes (cloud only)
<b>Thumbnails</b>	Yes — 4 engines	No	No	No
<b>Research</b>	Yes — Tavily API	Analytics only	Analytics only	No
<b>Rumble support</b>	Yes	No	No	No
<b>Multi-platform publish</b>	5 platforms	YouTube only	7 platforms	No
<b>Local AI (Ollama)</b>	Yes	No	No	No
<b>Works offline</b>	Yes	No	No	No

***Creator Studio AI is the only desktop tool that covers research, scripting, thumbnails, AND multi-platform publishing in a single one-time purchase.***

## The Workflow

Creator Studio AI follows a five-step production pipeline:

## 1. Topic → Research

Start with Full Auto (AI picks the topic), Enter My Idea (you pick), or Suggest Topics (AI offers 5 options). Tavily’s research engine fetches 8–15 verified sources — articles, news, Reddit, YouTube, blogs. Every fact comes with a link.

## 2. Research → Script

Choose your AI engine and script format. The script is written using your Channel DNA — your voice, your audience, your structure. Word count matches your target video length.

- **Formats:** Bullet Points, Narrative, Conversational, Educational
- **Lengths:** 3–5 min, 6–10 min, 10–15 min, 15+ min

## 3. Script → Thumbnail

A thumbnail prompt is auto-generated from your script. Choose your image engine, generate, then customize with text overlays, host photo, and channel logo using the 9-zone positioning grid.

## 4. Thumbnail → Export

Export your script as TXT, DOCX, or PDF. Save your thumbnail as PNG. Or use the one-click Complete Package to bundle everything into a project folder.

## 5. Export → Publish

The Multi-Platform Publisher generates ready-to-post copy for all five platforms with one click:

Platform	Generated Fields
YouTube	Title (60 chars), Description (200–300 words + CTA), Tags (10–15)
Rumble	Title (60 chars), Description (250–400 words), Tags (10–15)
TikTok	Hook, Caption (150 chars), Hashtags (5–8)
Instagram	Caption (150–220 chars + CTA), Hashtags (12–15), Story teaser
Facebook	Post (2–3 paragraphs, conversational, question-ending)

## Channel DNA

Channel DNA is your creative fingerprint. A 5-step setup wizard that teaches Creator Studio AI how to write like you:

- **Channel Setup** — Name, platforms, default video length
- **Audience Profile** — Target audience, niche, viewer pain points
- **Brand Voice** — Tone keywords, signature phrases, words to avoid
- **Video & Thumbnail Defaults** — Aspect ratio, style, host photo, logo, script template
- **Engines & API Keys** — Select AI providers, enter keys

Every script and thumbnail is generated through your Channel DNA. The output matches your voice, not generic AI.

**Note:** You can configure up to 5 separate channels, each with its own DNA. Switch channels with one click in the sidebar.

## AI Providers — Your Choice

Creator Studio AI supports **6 script engines**, **4 thumbnail engines**, and **1 research engine**. You bring your own API keys and pay providers directly.

### Script Engines

Provider	Cost	Sign Up
Gemini 2.5 Flash	Free tier available	<a href="https://aistudio.google.com/apikey">aistudio.google.com/apikey</a>
Claude (Anthropic)	Pay per use	<a href="https://console.anthropic.com/settings/keys">console.anthropic.com/settings/keys</a>
ChatGPT (OpenAI)	Pay per use	<a href="https://platform.openai.com/api-keys">platform.openai.com/api-keys</a>
Grok (xAI)	Pay per use	<a href="https://console.x.ai">console.x.ai</a>
OpenRouter	Pay per use	<a href="https://openrouter.ai/keys">openrouter.ai/keys</a>
Ollama (Local)	Free (runs locally)	<a href="https://ollama.com">ollama.com</a>

### Thumbnail Engines

Provider	Cost	Sign Up
DALL-E 3 (OpenAI)	Pay per use	<a href="https://platform.openai.com/api-keys">platform.openai.com/api-keys</a>
Ideogram	Pay per use	<a href="https://ideogram.ai">ideogram.ai</a>
Nano Banana 2 (Gemini)	Free tier	<a href="https://aistudio.google.com/apikey">aistudio.google.com/apikey</a>
Gemini Imagen	Free tier	<a href="https://aistudio.google.com/apikey">aistudio.google.com/apikey</a>

### Research Engine

- **Tavily API** — Multi-source search engine optimized for AI. Fetches verified facts with source links. Sign up at [tavily.com](https://tavily.com)

**Note:** Every pay-per-use provider lets you set a monthly spending cap — as low as \$5. Since each request costs fractions of a penny, \$5 can easily last an entire billing period.

**Start with a free Gemini key for scripting and Nano Banana 2 for thumbnails. Total cost: \$0.**

## Bilingual — English & Spanish

Creator Studio AI supports full English and Spanish interfaces. Toggle language in the sidebar. Scripts can be generated in either language, with platform-specific terminology for each.

This makes it ideal for bilingual creators who produce content in both languages or serve Spanish-speaking audiences across Latin America.

## Pricing

**\$59.99** one-time purchase

- Full application with all features
- Up to 5 channel configurations
- Multi-Platform Publisher (YouTube, Rumble, TikTok, Instagram, Facebook)
- All 6 script engines, 4 thumbnail engines, and research
- Ollama local AI fully integrated
- English and Spanish support
- Free updates
- No subscriptions, no recurring fees

AI costs are separate and controlled by you. **The free Gemini key covers scripting at zero cost.** Paid keys are optional and usage-based.

**\$149.99** Angry Pig Suite Bundle

Get Creator Studio AI plus the entire Angry Pig Productions suite at a discounted bundle price. Visit [angrypig.studio](http://angrypig.studio) for details.

## Why Creator Studio AI

### Own Your Production Pipeline

One app handles what used to require a browser extension, a web dashboard, a writing tool, an image generator, and five different platform tabs. Close the browser. Open Creator Studio AI.

### Own Your Privacy

Everything runs on your desktop. Your scripts, your research, your channel strategy — none of it lives on someone else's server. With Ollama integration, even AI processing stays fully local.

### Own Your Budget

\$59.99 once. Compare that to \$49/month for Jasper AI (\$588/year) or \$39/month for VidIQ Pro (\$468/year). Creator Studio AI pays for itself in the first month.

### Own Your Platforms

Creator Studio AI is one of the only tools that supports Rumble alongside YouTube, TikTok, Instagram, and Facebook. If you publish across platforms, this is built for you.

### Own Your AI

With Ollama now fully integrated in v4.0, you can run AI models entirely on your own hardware. No API keys needed, no usage fees, no data leaving your machine. Complete creative independence.

*“You became a content creator to create — not to manage a dozen tabs and pay rent on tools that should have been yours from the start.”*

**Seriously.**

## Get Started

### Purchase

Visit [angrypig.studio](https://angrypig.studio) and click Buy Now. \$59.99 via PayPal.

### Download

After purchase, visit the **Downloads page** for your installer and documentation.

### Activate

Launch the app, copy your Machine ID, email it to [sales@angrypig.studio](mailto:sales@angrypig.studio) with your order number. We send your activation key within 24 hours.

### Set Up Channel DNA

Walk through the 5-step wizard: channel info, audience, brand voice, defaults, and API keys. The free Gemini key is all you need to start.

## Support

[support@angrypig.studio](mailto:support@angrypig.studio)

Include your Machine ID and a description of the issue. We respond within 24 hours.
