

VOXFORGE

Activation Guide

One-Time License · Windows 10 / 11
Angry Pig Productions

v1.0.24 · April 2026

Step 1: Install VoxForge

Run **VoxForge_Setup.exe** from your purchase email or the Downloads page and follow the installer prompts.

- The app installs to Program Files automatically
- Click Yes if Windows prompts for permission
- A desktop shortcut is created for you

Note: *System requirements: Windows 10 or 11, 4 GB RAM minimum (8 GB recommended), 500 MB disk space, and a microphone.*

Step 2: Launch the App

Open VoxForge from your Start Menu or Desktop shortcut. The **Activation Screen** appears automatically on first launch.

Step 3: Copy Your Machine ID

Your unique Machine ID is displayed on the Activation Screen. This ID is tied to your specific computer.

- Click the **Copy** button to copy it to your clipboard
- Keep it handy — you will need it in the next step

Step 4: Request Your License Key

Email your Machine ID and order confirmation to:

support@angrypig.studio

- You can click **Open Email App** on the Activation Screen to auto-fill a message with your Machine ID
- We send your activation key within 24 hours

Step 5: Activate

Once you receive your activation key:

- Paste the key into the activation field on the Activation Screen
- Press Enter
- The app verifies the key and unlocks immediately

Tip: *If you purchased online, VoxForge may activate automatically — the app checks the server every few seconds while the Activation Screen is open.*

License Types

VoxForge — \$39.99

One price, everything included. Your license key unlocks all five modes — Author, Creator, Command, Dictation, and File Mode — plus every feature in the app. No tiers, no add-ons, no separate upgrades. The app runs 100% offline using Whisper — no API keys, no internet required.

Note: Your license key unlocks every feature in VoxForge — all five modes including File Mode. The key is tied to your Machine ID — one key per computer.

First Steps After Activation

Choose Your Mode

VoxForge opens in Author Mode by default. Use the mode buttons at the bottom of the screen:

- **Author** — Narrative writing with spoken punctuation and filler removal
- **Creator** — Structured templates for YouTube, blogs, email, and more
- **Command** — Voice commands to edit and format your document
- **Dictation** — Raw speech-to-text, no formatting

Select Your Microphone

Go to **Settings** (gear icon in the sidebar) and select your microphone from the dropdown. VoxForge filters out virtual devices — only real microphones are shown.

Set Up AI Editing (Optional)

The base app works fully offline with no API keys. To enable AI editing commands (summarize, rewrite, fix grammar, etc.), get a free Gemini key:

- Visit aistudio.google.com/apikey
- Sign in with your Google account and generate a key
- Paste it into **Settings** → **Gemini 2.5 (free)**
- Click Save Settings — the app restarts with AI enabled

Tip: The free Gemini key handles every AI command at zero cost. You only need a paid key if you want Spanish subtitle export in File Mode.

Additional AI Providers (Optional)

VoxForge supports five AI providers. Add any combination:

Provider	Cost	Sign Up
Gemini 2.5	Free	aistudio.google.com/apikey
OpenAI (GPT)	Pay per use	platform.openai.com/api-keys
Claude (Anthropic)	Pay per use	console.anthropic.com/settings/keys
Grok (xAI)	Pay per use	console.x.ai

OpenRouter	Pay per use	openrouter.ai/keys
------------	-------------	--------------------

Note: Every pay-per-use provider lets you set a monthly spending cap — as low as \$5. Since each AI request costs fractions of a penny, \$5 can easily last an entire billing period.

Need Help?

Email: support@angrypig.studio

Include your Machine ID and a description of the issue. We respond within 24 hours.
