What Is VoxForge?

VoxForge is a voice-to-text desktop application for Windows. It runs OpenAI Whisper entirely on your machine to transcribe your voice in real time — then formats the result according to the mode you choose.

No cloud. No subscriptions. No internet required. Your voice never leaves your computer. You buy VoxForge once and it is yours forever.

What Makes VoxForge Different

Most dictation tools today are cloud-based subscriptions. They upload your audio to remote servers, charge you monthly, and lock you into their ecosystem. VoxForge takes the opposite approach:

	VoxForge	Dragon	Otter.ai	Win Voice Typing
Runs locally	Yes — 100% offline	Partial	No — cloud only	Yes
Audio privacy	Never leaves your PC	Uploaded	Uploaded	Uploaded
Pricing	\$39.99 one-time	\$14.99/mo+	\$16.99/mo	Free (basic)
Multiple modes	5 specialized modes	1	1	1
AI editing	5 providers, your choice	Built-in only	Built-in only	None
Subtitles	SRT + Spanish (Premium)	No	Limited	No
Templates	YouTube, Blog, Email...	No	No	No

VoxForge is **self-contained**. The base application works entirely on your desktop with no accounts, no API keys, and no internet connection. Everything you need to dictate, format, and export your writing is built in.

VoxForge — \$39.99

One-time purchase. No subscriptions. Fully self-contained.

The base application runs 100% on your machine using Whisper AI. No API keys required. No internet needed. Four recording modes cover every type of writing:

Author Mode — Narrative Writing

Built for books, stories, essays, and long-form content:

- Spoken punctuation — say “period,” “comma,” “question mark,” “dash,” “open quote,” and more
- Chapter creation — say “chapter one the beginning” for a formatted heading
- Automatic filler removal — “um,” “uh,” “you know” stripped out
- Smart quote conversion and auto-capitalization

Creator Mode — Structured Templates

Five ready-made templates for content creators:

- **YouTube Script** — Title, Hook, Sections, Call to Action
- **Rumble Video** — Title, Description, Tags
- **Instagram Caption** — Caption, Hashtags
- **Blog Post** — Title, Intro, Sections, Conclusion
- **Email** — Subject, Greeting, Body, Sign-off

Command Mode — Voice-Controlled Editing

Manipulate your document without touching the keyboard:

- Convert to bullet points or numbered lists
- Change case — uppercase, lowercase, title case
- Delete last sentence, last paragraph, or clear everything
- Find and replace text
- Word count

***Note:** Command Mode also supports AI commands (summarize, rewrite, etc.) when you add a free or paid API key. See the AI Expansion section.*

Dictation Mode — Raw Flow

Pure speech-to-text. No formatting, no filler removal. What you say is exactly what appears. Perfect for meeting notes, brainstorming, or raw transcription.

Projects & Document Naming

- Organize work into projects (folders) with unlimited documents
- **Click the document title** in the topbar to rename it — no more “Untitled”
- Auto-save on project switch and app close
- Export as .txt with your document name pre-filled

Recording

- 3-second countdown before recording (configurable)
- Smart microphone selection — virtual devices filtered out
- Audio backup — last 5 recordings saved automatically
- Voice Glow Bar — real-time amber glow responds to your voice level
- Whisper model selection: tiny (fastest), base (balanced), small, or medium (most accurate)

Privacy

Your audio never leaves your computer. Whisper runs locally. No cloud uploads. No accounts. No tracking. No data collection. Your words are yours.

AI Expansion — Free or Paid, Your Choice

The base app is complete without any API keys. But when you're ready to expand, VoxForge connects to **five AI providers** for powerful editing commands:

- **“Summarize”** — Creates a concise summary of your text
- **“Rewrite”** — Improves clarity and flow
- **“Shorter”** — Reduces length, preserves key points
- **“Longer”** — Expands with more detail
- **“Fix grammar”** — Fixes punctuation, spelling, and readability

The **Edit button** in the topbar is a one-click shortcut: it sends your entire document through AI for grammar and readability. One click. Done.

Start Free

Grab a **free Gemini 2.5 API key** at aistudio.google.com/apikey in 30 seconds. Paste it into Settings. That's it — your entire app now has AI editing at zero cost.

Most users will never need to pay for AI. The free Gemini key handles every AI command perfectly.

Scale Up When You Need To

VoxForge supports five AI providers. Add any combination:

Provider	Cost	Sign Up
Gemini 2.5	Free	aistudio.google.com/apikey
OpenAI (GPT)	Pay per use	platform.openai.com/api-keys
Claude (Anthropic)	Pay per use	console.anthropic.com/settings/keys
Grok (xAI)	Pay per use	console.x.ai
OpenRouter	Pay per use	openrouter.ai/keys

Note: Every pay-per-use provider lets you set a monthly spending cap — as low as \$5. Since each AI request costs fractions of a penny, \$5 can easily last an entire billing period. You are always in control of your spending.

Auto-Cascade & Preferred Provider

VoxForge tries providers in cost order: Gemini first (free), then your paid keys as fallback. Or pin a Preferred Provider in Settings to always use your trusted service first. Maximum flexibility, zero lock-in.

File Mode — Media Transcription

VoxForge includes **File Mode** — a powerful mode that turns VoxForge into a full media transcription and subtitle production tool.

Transcribe Any Media File

Drop in any audio or video file and VoxForge transcribes it locally:

- **Audio:** MP3, WAV, M4A, OGG, FLAC, WMA, AAC
- **Video:** MP4, MKV, WEBM, AVI, MOV

No upload. No cloud. No waiting for a server. Your files stay on your machine.

Subtitle Export

- **Save .srt** — Industry-standard subtitle format with precise timestamps
- **Save .srt Español** — AI-translated Spanish subtitles in one click

Export files ready for YouTube, Rumble, or any platform that accepts SRT subtitles.

Translate to English

Import audio in **any language** and Whisper translates it to English automatically. Built into Whisper — free, offline, no API key needed.

Spanish SRT Translation

The Spanish subtitle export uses your AI provider to translate each segment. This is the one task where the free Gemini key hits its rate limit. For Spanish SRT, use a paid provider:

- Set Preferred Provider to Claude, OpenAI, Grok, or OpenRouter
- A \$5 monthly cap is more than enough for subtitle work

Note: *Gemini handles every other AI task perfectly. You only need a paid key for Spanish SRT.*

Editions & Pricing

Feature	Feature	Included (\$39.99)
Author Mode	Yes	Yes
Creator Mode (5 templates)	Yes	Yes
Command Mode (voice commands)	Yes	Yes
Dictation Mode	Yes	Yes

All Features Included — Every mode, every feature, one price. No add-ons required.

Angry Pig Complete Bundle — \$149.99. Get VoxForge plus Creator Studio AI, Signal Forge, and Business Suite.

Why VoxForge

Own Your Tools

One payment. No subscriptions. No renewal traps. VoxForge sits on your hard drive and works whether you have internet or not.

Own Your Privacy

Whisper runs 100% locally. Your voice, your documents, your creative work — none of it leaves your computer.

Own Your AI Budget

The base app needs no keys at all. When you want AI editing, grab a free Gemini key. If you need more, add paid keys with a \$5 monthly cap. You are never forced to pay for AI you don't use.

Own Your Workflow

Five modes, five AI providers, structured templates, voice commands. Switch providers with a dropdown. No lock-in. No migration.

Own Your Time

Speak naturally. VoxForge formats, cleans, and organizes. Close the app and walk away. Your work is saved, named, and exportable.

“You didn’t start writing to spend your time managing tools. VoxForge gets out of the way and lets you create.”

Seriously.

Get Started

Purchase

- **VoxForge** — \$39.99 (all features included)
- **Angry Pig Complete Bundle** — \$149.99 (all 4 apps)
- **Part of the Angry Pig Suite** — works with Creator Studio AI, Signal Forge, and Business Suite

Download

Visit angrypig.studio/downloads after purchase.

Activate

Launch the app, copy your Machine ID, email it to sales@angrypig.studio with your order number. We send your activation key within 24 hours.

Set Up AI (Optional)

Get a free Gemini key at aistudio.google.com/apikey and paste it into Settings. That’s all you need for AI editing at zero cost. Or skip it entirely — the base app works perfectly without it.

Support

support@angrypig.studio

Include your Machine ID and a description of the issue. We respond within 24 hours.
